

The Classico Collection

Superior protection and outstanding quality

The *Classico Collection* of textured vinyl upholstery fabrics from CTP Textiles combines style, quality and safety, together with antifungal, antibacterial and antimicrobial protection at a cost-effective price. All the products in the *Classico Collection* are flame retardant to Crib 5 and comply with all other relevant requirements for contract use. They are ideally suited for heavy domestic and contract upholstery, as well as a wide range of healthcare-related furniture and medical equipment applications.

The vinyl upholstery fabrics in the *Classico Collection* are easy to use, easy to clean and available in two attractive styles – *Como* and *Highlands*, each in a wide range of matching colours. The vinyl surface on each style is coated with PERMABLOK³* – an advanced vinyl protection from Spradling International. PERMABLOK³* is a proven vinyl protective coating that has been designed to create a tough, effective barrier against three major problems in the education, healthcare and hospitality environments – germs, abrasion and stains. PERMABLOK³* not only guards against stains, abrasion damage and the surface growth of fungus, mould and mildew spores – it also provides superior antimicrobial and antibacterial protection by resisting gram negative and gram positive bacteria (including MRSA), filamentous fungi and yeast.

Care and maintenance

Vinyl fabrics treated with PERMABLOK³* require minimum maintenance to retain their good looks. The vinyl surfaces can be cleaned using a damp, soapy cloth or sponge, and then rinsed with cold water and wiped dry. Spills and accidents require immediate attention for best results. In many cases, stains such as coffee, tea, cocoa, ketchup and blood, may be cleaned simply with warm water alone.

Stains from chemical colourings such as ballpoint pens, dyes and food colourings should be cleaned off as soon as possible to avoid long-term staining. If the stain is allowed to set, more concentrated cleaners may be required. Generally speaking, always start with the mildest cleaning agents first. Never use harsh powdered abrasive cleansers or steel wool.

Technical information

Composition:	PVC 86%
	Cotton 14%
Weight:	725g/m ²
Roll width:	137cm
Roll length:	30m (nominal)
Flame retardancy:	BS EN1021-1:1994 (Ignition Source - Smouldering Cigarette)
	BS EN1020-2:1994 (Ignition Source - Match Equivalent)
	BS5852:1990 Section 4: Ignition Source 5 (Wood Crib)
	BS7176:1995 Medium Hazard (Crib 5)
	IMO Fire Test Procedures Code, Annex 1, Part 8
