

Sierra

CONTRACT VINYL

Quality without compromise

The Sierra range of contract vinyls from CTP Textiles combines style, safety and quality at an affordable price. The products in the Sierra range are flame retardant to Crib 5 and comply with all other relevant requirements for contract use. They are suitable for heavy domestic and contract upholstery, as well as for a wide range of medical equipment applications. Sierra contract vinyls are easy to use, easy to clean and are available in a wide range of colours.

Care and maintenance

Sierra contract vinyls are resistant to most alkalis, mild acids, drinks and common stains but it is advisable to clean them regularly to maintain their smart appearance and prevent a build-up of residue. The surface of the vinyls can be cleaned using a damp, soapy cloth, and then rinsed with cold water and wiped dry. For more stubborn stains a soft brush with soapy water can be used, again rinsing with cold water and wiping dry. Disinfectants can be used in dilution as specified by the manufacturer.

Stains from chemical colourings such as ballpoint pens, dyes and food colourings should be cleaned off as soon as possible to avoid long-term staining. Strong detergents, solvents, bleaches, wax polishes and aerosol sprays must not be used as they may be harmful to the vinyl.

Technical information

Composition:	PVC 85%
	Polycotton 15%
Weight:	750 g/m ²
Roll width:	140 ± 2 cm
Roll length:	30m (nominal)
